

Anti Bullying workshop for first years in Moate Community School

School based workshops have become part and parcel of the SPHE program in MCS. On Monday 14th February all first years had the opportunity to explore issues in relation to bullying behaviour. Tutors are an important part of the Pastoral Care system in the school and with this in mind they facilitated the workshop. Covering this topic is very important because it outlines very clearly what bullying behaviour is and how to deal with it. Tutors will continue this work in the coming weeks and will cover areas such as Cyber bullying. For more information go to <http://www.moatecs.com/pastoralcare.html>
